

WHY TIMMDEK®

Bringing you the finest **quality** composite products. An ideal solution to suit **every** homes outdoor space.

Timmdek® has redefined the standard of excellence in the composite industry by consistently delivering innovative, durable, and sustainable products that surpass customer expectations. Our mission is to provide superior decking, cladding and pergola solutions that address the shortcomings of traditional materials while actively contributing to environmental sustainability. With a commitment to quality, sustainability, and unmatched customer service, Timmdek®'s aim is to establish itself as the industry leader, setting a new benchmark for composite materials.

Our company is characterised by a set of fundamental core values, they serve as the driving force behind our outstanding composite building materials and superior performance when compared to others in the sector.

As a global brand with projects across the Middle East, Africa, Asia, America and Europe, we have offices in the Netherlands, Johannesburg & Cape Town. We also work with distributors in 10 European countries.

TIMMDEK® ENVIRONMENTAL ETHOS

We produce Timmdek® composite products using a revolutionary combination of 95% recycled plastic and bamboo - that covers almost the entire material. Moreover, our company embraces eco-friendly manufacturing practices by recycling factory waste and avoiding the use of harmful chemicals. With our recycled ingredients, Timmdek® offers consumers a truly environmentally conscious option. Sustainability is deeply rooted in our company's ethos.

01 ENDLESS RESOURCE BAMBOO, NATURE'S RENEWABLE POWERHOUSE

Bamboo is a renewable resource that has the remarkable ability to grow faster than any other plant, with a growth rate of up to 1 meter per day! Each year, the mature stems, which are around 4-5 years old, are harvested, allowing space for the younger bamboo to thrive and reach maturity.

Timmdek® composite products are guaranteed to be CO₂ neutral throughout their entire life cycle.

02 HEALTHY AND FIRE-RESISTANT HEALTHY AND FIRE-RESISTANT SOLUTION FOR YOUR HOME

Timmdek® composite products offer a health-conscious option due to their antistatic and anti-allergic properties. Additionally, they have minimal emissions of VOCs (Volatile Organic Compounds), which are harmful to health. The high density of Timmdek® composite products allows them to meet rigorous fire safety standards, and Timmdek® has conducted thorough testing on most of our extensive range of composite products.

03 UP TO 25 YEARS GUARANTEE WE OFFER A GUARANTEE OF UP TO 25 YEARS

Creating the ultimate composite product requires meticulous attention to every aspect of its production. Our dedicated manufacturing team was specifically assembled for this purpose. It is their unwavering commitment that sets a Timmdek® composite product apart from standard ones.

In the rare event that any detail may have been missed, customers can rest assured knowing that we offer complete support and a 15 to 25-year guarantee across our composite ranges.

04 HIGH STABILITY COMPOSITE MATERIALS HAVE CHANGED THE GAME

Because of the composition of our bamboo and recycled plastic composite products experience significantly less shrinkage and swelling compared to solid wood species. As a result, they provide a highly stable solution, enabling the development of distinctive and captivating solutions and creations.

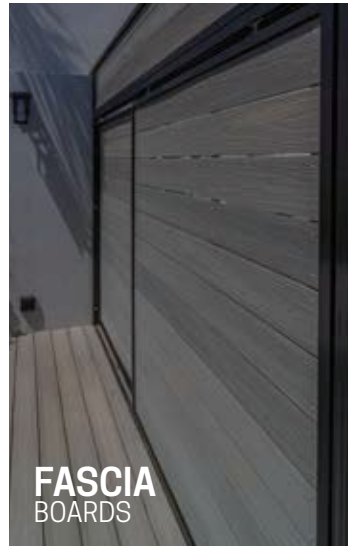

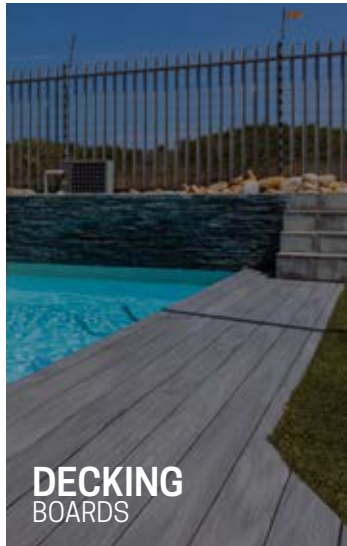

PRODUCT TESTING

All our products are extensively tested in the laboratory first then extensively tested in South Africa with less than 1% swell and less than 2% water absorption with no delamination. A European product is not guaranteed to work in South Africa but a South African product is guaranteed to work globally.

Our products undergo freeze store heat cycles for 24 hours and are soaked in boiling water for 8 hours in a lab. They are also put in a UV and weather acceleration chamber to resemble the harshest temperatures, ultimately resulting in the extensive 15 and 25 year warranties that we have available.

TIMMDEK® COMPOSITE PRODUCTS AND RANGES

At Timmdek®, we believe in putting our best foot forward with every single composite product we produce. Timmdek® was created as an answer to sub par composite products and a helpful solution to a growing environmental problem waste while offering great benefits.

THE ROCKIES RANGE

HIGH-PERFORMANCE, CAPPED,
LOW-MAINTENANCE DECKING THAT
CLOSELY RESEMBLES HARDWOOD.

THE ANDES RANGE

DUAL-TONE, LOW-MAINTENANCE
COMPOSITE DECKING THAT LOOKS &
FEELS JUST LIKE HARDWOOD.

THE ALPS RANGE

MODERN GROOVED,
LOW-MAINTENANCE DECKING THAT
GIVES OFF THE FINISHED HARDWOOD
APPEARANCE.
